EDUCATION

BML Munjal University, Gurugram
B.Tech, Computer Science and Engineering (AI Specialization)

2023 - 2027

SKILLS

Languages: JavaScript, TypeScript, Python, C/C++, SQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Django, React Native, Tailwind CSS, Prisma ORM, Shopify

Databases & Tools: PostgreSQL, MongoDB, SQLite, Supabase, Git, Docker, Kubernetes, AWS EC2, Azure, Terminus, Vercel

Automation & Web Scraping: RPA, Web Scraping, Browser Automation, Workflow Automation

Concepts: RESTful APIs, API Integration, Responsive UI/UX, CI/CD Pipelines, Cloud Deployment, Cloud Computing, DevOps, Full-Stack Development, Product Engineering, Data Structures & Algorithms, Object-Oriented Programming (OOP)

PROJECTS

Hospiverse India — B2B HORECA Procurement Platform
Next.js, TypeScript, React, Supabase, Tailwind CSS

2026

- Built B2B procurement and sourcing workflows connecting buyers with **40+ verified suppliers, including paying brands SALVA and Wang Professionals**.
- Engineered the marketplace end-to-end, leveraging DMAIC to optimize frontend, backend, database, and platform workflows.

Hlty.care — Wellness Platform
Next.js, Shopify, Tailwind CSS

2026

- Developed role-based platform with segmented journeys for parents, clinicians, and educators.
- Built Shopify-integrated workflows for instant resource delivery and automated user onboarding.

Freightos — Global Freight Agent Directory
Next.js, React, Microsoft Azure, Web Scraping

2026

- Architected a scraping-driven directory of **44,000+ verified freight agents** using SeleniumBase's CDP Mode for automated login, form-filling, and data extraction, centralizing contact and company data within a unified platform.
- Automated bulk agent selection and scheduled email outreach, streamlining client outreach.

PROFESSIONAL EXPERIENCE

SkyForge System Solutions
Full Stack Engineer - Intern

Mar 2026 - Present

- Developed RPA (Robotic Process Automation) workflows and web scraping tools to automate front-end data collection processes.
- Developing and maintaining a separate front-end product in parallel through pair programming, delivering responsive UI and integrated RESTful APIs.
- Deployed applications on Azure servers via Terminus, using Git workflows and CI/CD pipelines built with GitHub Actions and Jenkins in production environments.
- Collaborated cross-functionally with the founder and delivery team in Agile/Scrum sprints to translate feature requirements into shipped, production-ready code.

Hospiverse India (Startup)
Product Engineer – Freelance, Part-time

Jul 2026 - Present

- Drove end-to-end product engineering, accelerating **startup revenue to 6 figures within 3 months** through marketplace development.
- Collaborated directly with the founder to translate business requirements into production-ready features and workflows, following SDLC best practices.
- Diagnosed frontend, backend, database, and deployment bottlenecks through rigorous debugging and code review, optimizing platform performance.
- Architected and shipped marketplace features, integrating emerging trends and unconventional UX patterns.

CERTIFICATIONS & ACHIEVEMENTS

- Active GitHub contributor showcasing full-stack projects and modern development workflows.
- Google Cloud certified in Generative AI, Large Language Models, and Prompt Design (Vertex AI).
- Microsoft certified in Generative AI, AI Agents, and Anthropic Claude Code 101.
